A handwritten signature in dark ink, appearing to read "JW", is written over the printed name "James Warren".

Town of Clayton, NC, WRF Operations Superintendent

Re: Fiscal Note and DWR Recommended Changes to Neuse Estuary Rules

The Town of Clayton would like to make the following comment on the fiscal note provided to the Commission by DWR. The note states there is adequate nutrient allocations available for lease or purchase. This is simply not the case, the Town recently completed a capacity study and was unable to identify any dischargers with allocation for sale or long term lease in the Neuse River basin. The Town will need to develop additional capacity within the next 1 to 3 yr. window to support population and industrial needs. The current rules are very inhibitive to this process.
